CA-OS (AI Practice ERP) - Complete Feature List

1. Layer 1: Practice Operating System

Module 1: Dashboard & Navigation

- **Command Console:** High-fidelity overview of client risks, billing health, and operations.
- **KPI Scorecards & Radial Rings:** Circular compliance rating ring and metrics for active clients, pending filings, total billings, and active litigations.
- **30-Day Radar Timeline:** Feed displaying upcoming deadlines and active operations.
- **Urgent Alerts Feed:** Real-time notifications for notices received or mismatches requiring immediate review.
- **Dynamic Widget Canvas & Workspace Switcher.**

Module 2: AI Client Onboarding

- **Automated Credential Fetching:** Pulls PAN, GSTIN, and MCA registry details automatically.
- **Wizard Layout:** Step-by-step intake (Identification, Registry review, Letter editor, Portal invites).
- **Engagement Letter Generation:** AI-drafted engagement letters using LLM with variable placeholders.
- **Workspace Initialization:** Auto-triggers folder creation and deadline binding for the new client.

Module 3: Document Management

- **Centralized Repository:** Hierarchical file structure with drag-and-drop secure upload portal.
- **Smart OCR Ingestion:** Extracts data from multi-page PDFs, scans, and handwritten invoices.
- **Document History & Status:** File versioning, status badges, and metadata indexing.
- **Mobile Camera Scanner Overlay:** Direct invoice scanning and conversion to PDF via mobile.

Module 4: Bookkeeping & Accounting Automation

- **Bank Statement Ingestion:** Parses and standardizes transactions.
- **Auto Ledger Mapping:** ML-based ledger account matching with AI confidence scoring.
- **Expense Categorization:** Smart classification of business expenses (Travel, Utilities, etc.) with visual analytics.
- **Duplicate Detection & Triage:** Swipe interface (mobile) or column view (desktop) to approve or override mappings.
- **Real-Time Ledger Balance Tracking:** Continuously updates trial balance.

Module 13: Client Communication & Collaboration

- **Unified Communication Hub:** Contextual chat threads linking directly to tax calculations and documents.
- **WhatsApp API Integrations:** Automated follow-ups for billing and document requests.
- **Encrypted Client Approval Grids:** Secure link requests for client authorization and sign-offs.
- **Automated Signature Logs:** Maintains compliance audit logs of client approvals.

---

2. Layer 2: Compliance Operating System

Module 5: GST Compliance

- **GSTR-2B Reconciliation:** Matches portal records with accounting purchase ledgers.
- **Mismatch Highlighting:** Identifies supplier mismatches and precise variance amounts.
- **ITC Risk Profiling:** Calculates unclaimed ITC and flags compliance risks.

- **Filing Submission Checks:** Status tracking (GSTR-1, GSTR-3B) with color-coded completion charts.

Module 6: Income Tax Compliance & AIS

- **Automated ITR Preparation:** Processing for ITR-1 through ITR-6.
- **AIS/TIS Comparison:** Side-by-side reconciliation of Annual Information Statement against local book entries.
- **Tax Optimization:** AI suggestions for deductions and tax saving opportunities (e.g., Section 80C).

Module 7: Notices & Litigation

- **Notice Classification:** Extracts notice numbers, issuing authorities, section codes, and due dates from uploaded PDFs.
- **RAG Case Law Finder:** Semantic search across ITAT, CESTAT, High Court, and Supreme Court rulings using PGVector.
- **Automated Response Drafting:** AI agent writes formal replies to tax department notices.

Module 9: Payroll & Statutory Compliance

- **Automated Calculations:** Computes PF, ESI, Professional Tax, and Labour Welfare Fund based on local slabs.
- **Payslip Generation:** Generates compliant monthly payslips from attendance sheets.
- **Challan Preparation:** Ready-to-upload PF/ESI text files.
- **Employee Roster & CTC Tracking:** Graph comparisons of CTC vs. statutory contributions.

Module 10: Corporate Secretarial (MCA / ROC)

- **Company Incorporation Wizard:** Steps for establishing new entities.
- **Board/General Meeting Automations:** Generates notices and drafts meeting minutes from agenda templates.
- **Statutory Register Automation:** Maintains up-to-date corporate compliance records.
- **MCA E-Form Trackers:** Tracks SRNs and filing statuses for forms like AOC-4 and MGT-7.

Module 11: Compliance Calendar

- **Intelligence Calendar Engine:** Maps statutory deadlines (GST, ITR, TDS, PF, ROC) to specific clients.
- **Priority-Based Alerts:** Color-coded timelines showing overdue and upcoming deadlines.
- **Bulk Extensions:** Ability to push dates globally based on Finance Ministry announcements.

---

3. Layer 3: AI Intelligence Operating System

Module 12: CA Intelligence Engine (Central Brain)

- **OCR Intelligence Agent (LayoutLMv3):** Extracts structured data from raw financial documents.
- **RAG & Case Law Semantic Finder:** Contextual legal research using embedding models.
- **Ledger Classification Agent:** Reranks transactions against standard chart of accounts.
- **Drafting Agent:** LLM trained for Indian CA/CS formal writing standards.
- **Conversational Querying:** Natural language assistant ("Which clients have unclaimed GST credit above 5 Lakhs?") with text-to-speech for mobile.
- **Risk Scoring & 100% Audit:** Transaction-level risk calculation (0-100 score) evaluating fraud indicators like vendor newness, round amounts, and frequency anomalies.
- **Financial Insights Engine:** Generates proactive intelligence on revenue trends and unusual expense anomalies.

---

4. Layer 4: Security Operating System

Module 14: Security, Access & Administration

- **Granular RBAC:** Role-Based Access Control matrix for Partners, Staff, Articles, and Clients.
- **Zero-Knowledge Folder Vaults:** Encrypted storage for sensitive corporate keys and files.
- **DPDP-Compliant Consent Trackers:** Mandatory checkboxes for WhatsApp data retrieval and sharing.
- **Immutable Audit Logs:** Tracks IP addresses, timestamps, file downloads, and permission changes.
- **Temporary Access Grants:** Configurable expiry for junior staff read-only access and session revokes.

---

5. Layer 5: Experience Operating System

Module 15: Settings & Configuration

- **White-Label Firm Layout:** Customizable firm logo, primary hex colors, typography, and custom domain routing.
- **Notification Rules Configurator:** Setup custom alert routing for things like GST late filings.
- **AI Fine-Tuning & Integration Dashboards.**
- **Mobile Viewport Blocker:** Enforces desktop usage for complex data grids while keeping chat and scans mobile-friendly.

Module 16: Reports & Export Hub

- **Unified BI Aggregator:** Combines cross-module data (GST, P&L, Litigation) into single analytics reports.
- **Report Templates Builder:** Customizable visual layouts for client meetings.
- **Secure Shared Link Creators:** Expiry-restricted and password-protected PDF downloads.
- **Cryptographic Signatures:** Digital Signature Certificate (DSC) application and PDF watermarking.
- **Scheduled Recurrent Dispatches:** Automated recurring report sharing to clients.

---

6. Global Shared Features

- **Global Command Center (Ctrl + K):** System-wide search fetching matches across clients, PANs, documents, and litigation, with fast-action commands (e.g., `> New Client`).
- **Universal Status System:** Standardized hex-color mapping across the entire application (e.g., Green for Success, Amber for Review, Red for Overdue, Violet for AI Review).
- **Document-to-Report Pipeline:** Complete end-to-end automation where uploading a document flows automatically into ledger mapping, GST, AIS, and final reporting without manual data entry.
- **AI Latency & Outage Fallbacks:** Graceful UI degradation and local caching when AI services hit rate limits.
